

Agricultural Storage Solutions

FARM EQUIPMENT

Maintain the Value of Your Equipment

Fight equipment depreciation with a Cover-All® building. Protecting your machinery from the elements reduces rusting and extends the life of bearings, belts and hoses. Your equipment retains its appearance and has a higher trade-in or resale value. The clear-span design provides maximum room to maneuver and store equipment.

COMMODITIES

Multi-Purpose Storage

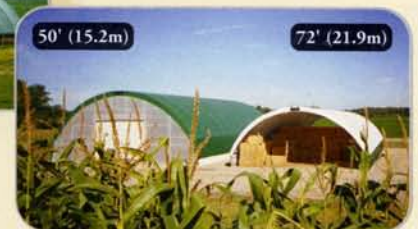

The clear-span Cover-All® design makes handling commodities efficient with no columns or posts to interfere with grain handling equipment. Unlike other grain storage systems, which can sit empty when not in use, your Cover-All® can be used for off-season equipment storage. Producers who store their grain in covered piles tell us their Cover-All® reduces cost-per-bushel for storage and grain loss to spoilage.

HAY STORAGE

Maintain the Value and Reduce Spoilage

Unprotected hay bales can lose up to 30% of nutritional value from mildew and rot within one year. A Cover-All® protects your hay bales from spoilage while maintaining feed value. By maintaining the value of your hay, you will recover your building investment quickly.

WASTE MANAGEMENT

Optimal Controlled Environment

The natural light and controlled composting environment in a Cover-All® allows for optimal conditions to enhance decomposition. Advanced coating and finish processes ensure all exposed steel is corrosion resistant and the DuraWeave® covers will not rust. Open-end design encourages maximum fresh airflow through the building. Cover-All® buildings are USDA approved for manure handling and storage facilities in many states.

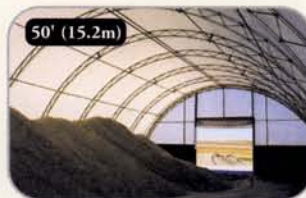

Superior Choice for Agriculture

Cover-All offers bright, high quality clear-span buildings of exceptional value that serve multiple functions to maximize the return on your farm building investment. Cover-All® Legend™ buildings are pre-engineered for use world-wide in widths from 18' to 82' and for wall and ground mount applications. Contact your local, independently owned, authorized Cover-All® Dealer for more information about profiles, heights and sidewall clearances.

Legend™ Building Series (LBS)

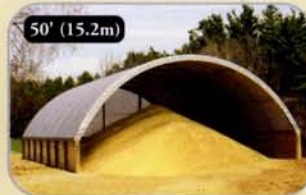

The Legend™ Building Series is constructed using the patented continuous web design.

Widths: 18' to 82'

Foundation Options

Cover-All® Legend™ buildings can be installed on a wide variety of foundations dependant on customer's site conditions.

Finishing Touches

A variety of end wall, door and foundation options may be used in the construction of your building. With the addition of ridge-vents, skylights, side curtains and our innovative DuraTrac™ doors, Cover-All can create just the right interior for your agricultural needs.

Quality Buildings Backed By Quality Materials

Cover-All's framework is constructed with ViperSteel® and clad with triple coated Gatorshield® corrosion barrier. Independent salt-spray tests show that Gatorshield® provides a service life three times longer than galvanized steel. Welds are sandblasted and finished with a molten zinc anti-corrosion process.

DuraWeave® covers are virtually maintenance free and backed by a 15-year pro rata limited warranty. Developed for Cover-All®, DuraWeave's® patented double stack weave provides high strength to weight ratios, and tremendous rip, tear and puncture resistance. The covers are available in a variety of colors.

The Cover-All Advantage

Versatility

Unlike a single-purpose building, a Cover-All® can serve many functions over the years, from commodity storage to an equipment workshop. Cover-All® buildings can also be relocated or extended to meet your changing needs.

Support

Cover-All® buildings are backed by the best support team in the industry.

Quality

Designed for strength and durability using high quality components. Cover-All® buildings are also virtually worry-free and easy to maintain.

Atmosphere

Cover-All® buildings provide natural lighting, exceptional sound dampening properties, and superior ventilation.

Installation

Cover-All® buildings are quick to install and allow for flexible foundation options.

Global Dealer Network

Your local authorized Cover-All Dealer is part of a world-wide product support network providing you with service and support for all your building needs - before, during and after your building installation.

Cover-All Flex Lease Program

We have partnered with leaders in the industry to offer you more choices in making a Cover-All® the affordable solution for your needs. Cover-All® Dealers make it easy to arrange a lease program that meets your financial plan.

"We are thrilled with our Cover-All – we would never go back to a steel structure. Its design, fit and finish is also far superior to other fabric structures available. Everyone else who we show it to is as impressed as we are."

F. Schnell – Canada
