

Falcon Lake Golf Course

Location: Falcon Beach, MB

Application: Golf Cart Storage

Building Series: LEGEND®

Building Size: 32' (9.7m) wide x 120' (36.5m) long

Cover-All - Offers Everyday Weather Protection

Falcon Lake Golf Course is a beautiful 18 hole course located 90 minutes east of Winnipeg, Manitoba on the Trans Canada Highway. Ranked number 30 out of the top 100 golf courses in Canada, Falcon Lake Golf Course offers a challenging course stretching from 6600 to 7000 yards. When Falcon Lake Golf Course purchased a new fleet of golf carts, they decided to store them inside a Cover-All® building. The 32' (9.7m) wide x 120' (36.5m) long Cover-All® Legend® building houses 60 carts daily.

This business decision has resulted in a lot less maintenance. The building includes a wash facility where the carts are cleaned and prepped the night before. In the morning, the carts are unplugged and moved out of the building in perfect condition and ready to go. "Every morning getting up to wipe and dry off the carts was a bit aggravating," says Jeff Heiland, Associate Golf Professional at Falcon Lake Golf Course. "We used to have to wipe off the dew, the water, and the bugs everyday."

Sandy Kurceba, a former Australian tour player, is an international trick shot artist and is also the Director of Golf at Falcon Lake Golf Course. "This building is functional because we can get the carts coming in the back door to get cleaned, washed and housed with electricity," says Sandy. "It's big enough to do all the work that we have with the carts."

Falcon Lake Golf Course chose a darker green fabric to blend in with the surrounding natural environment. "The color is terrific because it blends with the scenery. It is a very functional building for our space and time," says Sandy.

The Cover-All® building offers a lot of room to move around inside. It is also used as a winter storage facility for the rest of the maintenance equipment. Green mowers, t-mowers, tractors, and carts are all stored inside which helps to reduce the wear and tear on the equipment. "The carts are really quite good, as far as sun fading and wear and tear," says Jeff. "The condition of our golf carts at the end of our five-year lease, look as good as the day they were picked up!" Sun damage, water contamination, and any corrosion problems are avoided by using the Cover-All® building for storage.

"This building is functional because we can get the carts coming in the back door to get cleaned, washed and housed with electricity. It is a very functional building for our space and time."
