

Woolley Park Farms

Location: Bradford on Avon, Wiltshire, England

Application: Young Poultry Housing

Building Series: 1 - Legend™, 2 - Arch™

Building Size: 62' wide x 84' long (18.8m x 25.6m),
30' wide x 60' long (9.1m x 18.2m)

Cover-All® Buildings Provide a Variety of Agriculture Solutions

After learning about Cover-All Building Systems and the local dealer, Westbrand, at a farm buildings exhibition, Russell Candy made the decision to purchase Cover-All® buildings for his poultry rearing operation and contracting business. Some of the key features that helped make his decision were the interior environment of the building and the ease of construction.

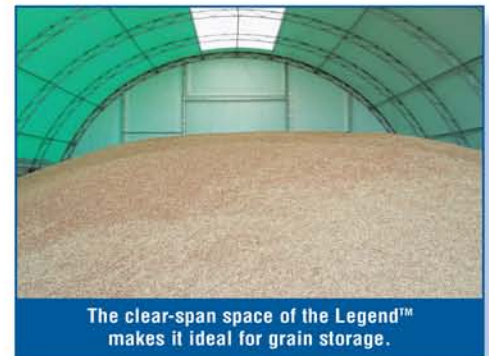

The two QuickStructures Arch™ buildings, 30' wide x 60' long (9.1m x 18.2m), are used for poultry housing. The Duraweave® cover of the buildings features sound dampening qualities which create more comfort for the chicks living inside. "The healthy environment will mean less mortalities and a better growth rate enabling more birds to be reared for the market," says Russell. The translucent properties of the cover also allow natural light through, creating a bright interior that transmits less heat which means a better environment all around. These buildings are also used for machinery storage, and are ideal due to the clear-span design. "The value of the machinery stored under cover will be maintained, enabling a better trade-in price when purchasing replacements," comments Russell.

The third building, a 62' wide x 84' long (18.8m x 25.6m) Cover-All® Legend™ Series, is currently being used for grain storage. In the future, this building will be used to house the older turkeys. The cost comparison between conventional buildings, the rapid construction time, and the fact that the groundwork can be done by on-farm staff made the choice of Cover-All the right one for Russell. Friends and neighbours alike are very impressed with the quality and robustness of the buildings that Russell has on his farm. The fabric of the buildings has tremendous rip, tear, and puncture resistance, and is a very attractive material available in a variety of colors.

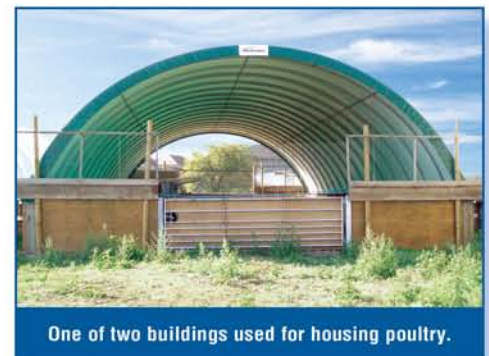

Russell has utilized Cover-All buildings for livestock, grain storage, and machinery storage to date. As his operation continues to grow, Russell plans to use Cover-All and Westbrand, the local dealer, as his preferred building supplier.

Friends and neighbours are impressed with the quality and robustness of the buildings.

The clear-span space of the Legend™ makes it ideal for grain storage.

One of two buildings used for housing poultry.

"The healthy environment will mean less mortalities and a better growth rate enabling more birds to be reared for the market," says Russell.

"The healthy environment will mean less mortalities and a better growth rate enabling more birds to be reared for the market."
